

Wireless Innovations for
the Production Floor

Metal Stamping

VersaCall VT2000 Metal Stamping System

Innovative Wireless Systems For Capturing Floor Performance

VersaCall VT2000 Metal Stamping System

A New Dimension in Profiling Performance

A Completely Integrated Wireless System For Stamping Presses

From Shop Floor Data Capture To Performance Visibility

Automated data Capture of Production Performance

- Set-Up
- Run Time & Cycle Time
- Counts
- Downtime by Reason Code
- Scrap by Reason Code
- Immediate communications of Production Issues
- Visual Factory
- Tool Tracking Module
- Reporting
 - OEE
 - Virtual & Hardcopy Reports & Graphs
- Cost Effective – Wireless!

VersaCall VT2000 Metal Stamping System

System Simplicity

Simple to Configure

Engineered to be Tailored to Individual Customer Requirements

Simple to Install

Out of the Box Connectivity with Set Interfaces

Simple to Use

Data Capture Modules Designed for Simple Operator Use

Simple Intuitive Report Generation

Unparalleled Production Visibility - Real Time & Hard Copy

VersaCall VT2000 Metal Stamping System

Visual Factory Performance Visibility

- Shop Floor Performance Displays
- Virtual Dashboards Performance Visibility
- Real Time Graphs and Reports
- OEE
- Custom Software
